IMPACT AT A GLANCE

$1M+	30+ FTEs	10 Members	5+
Revenue Enabled	Savings Delivered	Team Managed	Global Clients

ABOUT ME

I don't just build automation - I find it, justify it, design it, and lead the teams that deliver it. With 6+ years of experience spanning RPA architecture, process consulting, and cross-functional team management, I bring a rare combination of technical depth and business acumen that most professionals develop separately over a decade. Holding an MBA from GISMA Business School, Berlin, and having worked directly with US-based clients and global Fortune 100 organisations, I operate confidently at every level, from workshop floors with operations teams to boardrooms with CXOs. Currently at Infosys BPM, I drive end-to-end automation strategy while simultaneously managing a 10-member RPA and development team. I build business cases, recommend technologies, lead Scrum delivery, and ensure what gets built actually solves the right problem. My track record speaks for itself: $1M+ in business value enabled, 30+ FTEs saved in total, and five successful go-lives across global clients.

PROFESSIONAL EXPERIENCE

Tech-Enabled Business Consultant & Production Support Manager — *Nov 2025 – Present*

Infosys BPM Ltd. • Bengaluru

- → Conduct structured interviews and workshops with operations teams to perform end-to-end process discovery and identify automation candidates.
- → Build detailed cost-benefit analyses and business cases to quantify FTE savings and ROI for proposed automation initiatives.
- → Produce BRDs, Solution Design Documents (SDDs), process flow maps, and technology recommendation frameworks covering RPA, AI/ML, and GenAI.
- → Present automation findings, business cases, and solution proposals directly to senior leadership and CXOs for strategic sign-off.
- → Liaise with vendors and third-party tool providers to evaluate technologies and ensure alignment with enterprise architecture standards.
- → Simultaneously working as a Support Manager for the RPA Production Support and leading the delivery development team, with a combined team size of 10 members.
- → Run Jira-based Scrum ceremonies, from sprint planning, backlog grooming, daily standups, and retrospectives. Ensuring on-time, quality delivery.
- → Serve as the single point of contact bridging business operations and technical delivery teams across the full project lifecycle.

Senior Associate Consultant – Automation Lead & RPA Architect — *Oct 2022 – Sep 2024*

Infosys BPM Ltd. • Bengaluru

- → Saved $600,000 USD (8 FTEs) via Adjustments and Retirement Plan automation; $200,000+ USD (6 FTEs) via Annual Plan Reporting Service automation.
- → Led Hyper-automation delivery using UiPath, Python, and Power BI to 30% operational improvement across two continents in an Agile setup.

→ Managed project timelines and end-to-end delivery schedules, ensuring milestones were met across complex, multi-team automation programmes.

→ Handled client-facing calls and demos for US-based stakeholders, presenting solution progress, gathering feedback, and aligning delivery with business expectations.

→ Built and maintained executive KPI dashboards; conducted UAT, POC, A/B testing, and compliance alignment reviews.

→ Identified new automation opportunities independently, contributing to roadmap planning and MVP scoping in Agile environments.

→ Mentored global team of 10 across time zones; drove sprint ceremonies, backlog management, and root cause analysis of production issues.

Associate Consultant – Senior RPA Developer *Aug 2021 – Oct 2022*

Infosys BPM Ltd. • Bengaluru

→ Applied SDLC principles to automation initiatives, owning core solutions from requirements gathering and stakeholder alignment through to post-implementation support.

→ Supported planning, testing, and feedback cycles with stakeholders across operations and IT.

RPA Developer *Jul 2019 – Aug 2021*

Jiffy.ai • Bengaluru

→ Designed and implemented the first automation use case for AirAsia, enabling a $1M USD project and laying the foundation for their long-term digital transformation roadmap.

→ Led delivery of automation solutions across multiple business verticals for Fortune 100 clients including KPMG, Lulu Exchange, and NLGIC — contributing to five successful go-lives.

→ Led automation delivery for Volvo (manufacturing), ensuring PLM system integration aligned with BOM and lifecycle governance principles.
